

How an AI use case moves from idea to production — safely, and at speed.

A two-stage triage: BU self-serves the answer for >70% of cases via a 5-question screen. The rest go to CoE for formal categorization, then parallel technical, vendor and rights review before a single board approval.

Owner AI CoE — Governance
Scope All AI/ML use cases, EU operations
SLA Fast lane ≤ 5 d • Full review ≤ 20 d
Review Quarterly • Risk & Audit Cttee

— RISK CLASSIFICATION (EU AI ACT, ART. 5–6)

Minimal risk

Spam filters, internal productivity tools. Voluntary code of conduct only.

Limited risk

Chatbots, generative content. Transparency & disclosure obligations.

High risk

HR, credit, critical infrastructure. Full conformity assessment & FRIA.

Prohibited

Social scoring, manipulation. Blocked at intake — no exceptions.
